### BUILDING OPERATIONS

SOUTH AUSTRALIA

SEPTEMBER QUARTER 1965

#### SCOPE

This bulletin gives information about "new building" operations in South Australia; in addition to a summary for the period 1960-61 to September 1965 it shows details concerning houses and flats, other buildings, employment in the industry, and dwellings in local government areas. The information has been compiled from returns collected from all builders of new buildings.

#### DEFINITIONS

**NEW BUILDING:** Additions of £5,000 and over to existing buildings (other than houses) are included, but minor additions, alterations, repairs and renovations, and all construction activity such as railways, bridges, earthworks, water storage, etc., are excluded.

**VALUE:** All values shown exclude the value of land and, except in Table 4, represent the value of buildings upon completion (see also "Completion"). Values shown in Table 4 represent the amount of work done on new buildings during the period and are not subject to the fluctuations from period to period noted in Table 3 in the values of "new buildings other than dwellings"; these fluctuations are partly the result of the unequal incidence of individual large contracts.

**COMMENCEMENT:** A building is recorded as commenced when work on the foundation has begun.

**UNDER CONSTRUCTION:** Once commenced, even though work on it may have been temporarily suspended, a building is classified as "under construction" until its "completion".

**COMPLETION:** A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-built house when the dwelling is either completed or occupied (whichever occurs first). However, the value in all cases is that of the building as a finished project as planned.

#### COMMENTS

2,525 houses were commenced and 2,836 were completed during the three months ended September 1965. Commencements were 258 less than in the June quarter 1965 and 407 less than in the September quarter 1964. The number of houses completed in the September quarter 1965 was 84 more than in the previous quarter. Houses under construction totalled 5,498 at 30th September, the lowest number for eighteen months.

The number of flats commenced has decreased in each quarter since December 1964. The number of 416 in the September quarter was 77 less than in the preceding three months. Completions of flats reached a record 580, the previous highest number being 570 in March quarter 1965.

The number of persons recorded as employed on all jobs of builders of new buildings at 30th September was 14,531. This is 736 less than the previous quarter, and the lowest since March 1964 when 13,753 persons were recorded.

During the twelve months ended September 1965, 10,860 dwellings (83.3% of the State total) were completed in or near the Metropolitan Area; 52.1% were inside the Metropolitan Area but a further 31.2% were completed in the near metropolitan local government areas of Elizabeth, Munno Para, Noarlunga, Salisbury, and Tea Tree Gully. A further 457 dwellings were completed at Whyalla.

Note: Building employment covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
